Printed in Great Britain

Contents of Volume 72

Number 1, 8 May 1978

ENGEL, P. C., The Detection of Amino Acid Sequence Homology: A New Scoring Method Based on the Genetic Code with Allowance for Redundancy 1

DUNKER, A. K. and MARVIN, D. A., A Model for Membrane Transport through α-helical Protein Pores 9

HILL, T. L. and CHANCE, B., Steady-State Kinetics of Models of Respiratory Chain Enzymes with Isopotential Pools and Conformational Site Enzymes 17

GALAS, D. J., On the Symmetries of Multi-Palindromic DNA Sequences 57

BONCINELLI, E., A Model of Post-transcriptional Control in Eukaryotic Cells 75

GANI, J. and SAUNDERS, I., Nucleolar Aggregation: Modelling and Simulation 81

MARKVART, T., Exciton Transport in the Photosynthetic Unit . 91

MARKVART, T., Infinite Model of Connected Photosynthetic Units . 117

SOKOLOVE, P. G. and BUSHELL, W. N., The Chi Square Periodogram: Its Utility for Analysis of Circadian Rhythms 131

BASS, L., ROBINSON, P. and BRACKEN, A. J., Hepatic Elimination of Flowing Substrates: The Distributed Model 161

YODZIS, P., Environmental Randomness and the Tenacity of Equilibria 185

WICKEN, J. S., Information Transformations in Molecular Evolution . 191

Number 2, 22 May 1978

HEARNE, E. M. III., DRANE, J. W., PIERCE, A., HARRIS, G. and JOHANSON, W. G. Jr., A Model for Bacterial Activity in the Lung . . 205

MATTHEWS, R. H. and ALBEN, J. O., Fitting Kinetic Data for Two Independent Saturable Terms by MULTIFIT II, a General Purpose Curve Fitting Program in FORTRAN IV 219

COHEN, M. S., The Cyclic AMP Control System in the Development of *Dictyostelium Discoideum*. II. An Allosteric Model . . . 231

TOIVONEN, H. and RYTÖMAA, T., Monte Carlo Simulation of Malignant Growth. Examples of the Behavior of Chloroleukemia after Specific Perturbation 257

VAN HAM, P. and LASTERS, I., Reduction Methods for Logical Control Networks 269

ANAN, Y. and GŌ, N., Behavior of Chemical Reaction Catalyzed by Allosteric Enzyme: Threshold Phenomena and Discontinuous Transition to Oscillatory State 283

CHARLESWORTH, B., Some Models of the Evolution of Altruistic Behaviour between Siblings 297

BARDSLEY, W. G. and WAIGHT, R. D., Factorability of the Hessian of the Binding Polynomial. The Central Issue Concerning Statistical Ratios Between Binding Constants, Hill Plot Slope and Positive and Negative Co-operativity 321

LETTER TO THE EDITOR

BARDSLEY, W. G. and WYMAN, J., Concerning the Thermodynamic Definition and Graphical Manifestations of Positive and Negative Co-operativity 373

Number 3, 8 June 1978

WILLIAMS, M. B., Sexual Selection, Adaptation, and Ornamental Traits: The Advantage of Seeming Fitter 377

MACWILLIAMS, H. K. and PAPAGEORGIOU, S., A Model of Gradient Interpretation Based on Morphogen Binding 385

HINES, W. G. S., Mutations and Stable Strategies 413

ELSETH, G. D., JUETERSONKE, G., BIERMAN, M. A., KARCHER, L. P. and BAUMGARDNER, K. D., A Kinetic Model for Bacterial Transfection: The Lambda DNA System 429

YČAS, M., GOEL, N. S. and JACOBSEN, J. W., On the Computation of the Tertiary Structure of Globular Proteins 443

SINGH, U. N., Adaptation in Micro-organisms II: Transient Behaviour Following Shift-up and Shift-down 459

MULAŚ, P. and MCQUARRIE, D. A., Effect of Surface Charge Density on the Kinetics of Trans-Membrane Lipid Migration in Asymmetric Bilayers 475

STEIN, R. B. and BLUM, J. J., On the Analysis of Futile Cycles in Metabolism 487

HONDA, H., Description of Cellular Patterns by Dirichlet Domains: The Two-Dimensional Case 523

GORDON, L. G. M., The Electrical Resistance of Epithelia in the Presence of Osmotic and Hydrostatic Pressure Gradients . . . 545

PITT, R., Warfare and Hominid Brain Evolution 551

SENŌ, M., IWAMOTO, K. and SAWADA, K., Instability and Oscillatory Behavior of Membrane-Chemical Reaction Systems . . 577

Number 4, 22 June 1978

ROSIN, R., The Honey Bee "Language" Controversy . . . 589

SHINAGAWA, Y., Analytical Solution of the Poisson–Boltzmann Equation for Membrane Potential 603

IWASA, Y., Optimal Death Strategy of Animal Populations . . 611

ABSHER, R. G. and ABSHER, P. M., Mathematical Models and Computer Simulations of Proliferation of Human Diploid Fibroblast Clones 627

BUCHMANN, S. L. and HURLEY, J. P., A Biophysical Model for Buzz Pollination in Angiosperms 639

KRASNOW, R. A., Mass, Length and Growth Rate in Single Cells . 659

BENFORD, F. A., Fisher's Theory of the Sex Ratio Applied to the Social Hymenoptera 701

WOLF, M. B. and DELAND, E. C., The Association Between K^+ and H^+ Distribution in Skeletal Muscle: Implication to Linked Transport 729

WOODWARD, D. R., Is the "Difference Index" Useful for Assessment of Protein Relatedness? 743

LETTERS TO THE EDITOR

GIESSNER-PRETTRE, C. and PULLMAN, B., An *Ab Initio* Reinvestigation of PC and PH Coupling Constants in Phosphates . 751

DEROME, J-R., On the Relationship Between Metabolism and Body Mass 757

ABSHER, R. G. and ABSHER, P. M., Mathematical models and computer simulations of proliferation of human diploid fibroblast clones, 627
ABSHER, P. M. (see ABSHER, R. G.), 627
Adaptation, sexual selection and ornamental traits: the advantage of seeming fitter, 377
ALBEN, J. O. (see MATTHEWS, R. H.), 219
Altruistic behaviour between siblings, some models of the evolution of, 297
Amino acid sequence homology: a new scoring method based on the genetic code with allowance for redundancy, the detections of 1
AMP, cyclic, control system in the development of *D. discoideum*. II. an allosteric model, 231
ANAN, Y. and GO, N., Behaviour of chemical reaction catalyzed by allosteric enzyme: threshold phenomena and discontinuous transition to oscillatory state, 283
Angiosperms, a biophysical model for buzz pollination in, 639

Bacterial activity in the lung, a model for, 205
Bacterial transfection: the lambda DNA system, a kinetic model for, 429
BARDSLEY, W. G. and WAIGHT, R. D., Factorability of the hessian of the binding polynomial. The central issue concerning statistical ratios binding constants, Hill plot slope and positive and negative co-operativity, 321
BARDSLEY, W. G. and WYMAN, J., Concerning the thermodynamic definition and graphical manifestations of positive and negative co-operativity (letter), 373
BASS, L., ROBINSON, P. and BRACKEN, A. J., Hepatic elimination of flowing substrates: the distributed model, 161
BAUMGARDNER, K. D. (see ELSETH, G. D.), 429
BENFORD, F. A., Fisher's theory of the sex ratio applied to the social hymenoptera, 701
BIERMAN, M. A. (see ELSETH, G. D.), 429
BLUM, J. J. (see STEIN, R. B.), 487
Body mass, on the relationship between metabolism and (letter), 757
BONCINELLI, G., A model of post-transcriptional control in eukaryotic cells, 75
BRACKEN, A. J. (see BASS, L.), 161
Brain evolution, hominid, warfare and, 551
BUCHMANN, S. L. and HURLEY, J. P., A biophysical model for buzz pollination in angiosperms, 639
BUSHELL, W. N. (see SOKOLOVE, P. G.), 131
Buzz pollination in angiosperms, a biophysical model for, 639

Cells, mass, length and growth rate in single, 659
Cellular patterns by Dirichlet domains: the two-dimensional case, description of, 523
CHANCE, B. (see HILL, T. L.), 17
CHARLESWORTH, B., Some models of the evolution of altruistic behaviour between siblings, 297
Chloroleukemia after specific perturbation, Monte Carlo similation of malignant growth, example of the behaviour of, 257
Circadian rhythms, the chi square periodogram: its utility for analysis of, 131

COHEN, M. S., The cyclic AMP control system in the development of *Dictyostelium Discoideum* II. An allosteric model, 231
Co-operativity, positive and negative, concerning the thermodynamic definition and graphical manifestations of, 373

DELAND, E. C. (see WOLF, M. B.), 729
DEROME, J-R., On the relationship between metabolism and body mass (letter), 757
Dictyostelium discoideum II. An allosteric model, the cyclic AMP control system in the development of, 231
"Difference index" useful for assessment of protein relatedness?, 743
Dirichlet domains: the two dimensional case) description of cellular patterns by, 523
DNA, lambda, system, a kinetic model for bacterial transfection, 429
DNA sequences, on the symmetries of multi-palindromic, 57
DRANE, J. W. (see HEARNE, E. M. III), 205
DUNKER, A. K. and MARVIN, D. A., A model for membrane transport through α-helical protein pores, 9

ELSETH, G. D., JUETERSONKE, G., BIERMAN, M. A., KARCHER, L. P. and BAUMGARDNER, K. D., A kinetic model for bacterial transfection: the lambda DNA system, 429
ENGELS, P. C., The detection of amino acid sequence homology: a new scoring method based on the genetic code with allowance for redundancy, 1
Environmental randomness and the tenacity of equilibria, 185
Enzyme, allosteric, behaviour of chemical reaction catalyzed by, threshold phenomena and discontinuous transition to oscillatory state, 283
Enzymes, conformational site, steady-state kinetics of models of respiratory chain enzymes with isopotential pools and, 17
Enzymes, respiratory chain, with isopotential pools and conformational site enzymes, steady-state kinetics models of, 17
Epithelia in the presence of osmotic and hydrostatic pressure gradients, the electrical resistance of, 545
Eukaryotic cells, a model of post transcriptional control in, 75

Fibroblast clones, human diploid, mathematical models and computer simulations of proliferation of, 627
Fisher's theory of the sex ratio applied to the social hymenoptera, 701
Futile cycles in metabolism, on the analysis of, 487

GALAS, D. J., On the symmetries of multi-palindromic DNA sequences, 57
GANI, J. and SAUNDERS, I., Nucleolar aggregation: modelling and simulation, 81
GIESSNER-PRETTRE, C. and PULLMAN, B., An *ab initio* reinvestigation of PC and PH coupling constants in phosphates (letter), 751
GO, N. (see ANNAN, Y.), 283
GOEL, N. S. (see YČAS, M.), 443
GORDON, L. G. M., The electrical resistance of epithelia in the presence of osmotic and hydrostatic pressure gradients, 545
Gradient interpretation, a model of, based on morphogen binding, 385

HARRIS, G. (see HEARNE, E. M. III), 205
HEARNE, E. M. III, DRANE, J. W., PIERCE, A., HARRIS, G. and JOHANSON, W. G. JR., A model for bacterial activity in the lung, 205

Hepatic elimination of flowing substrates: the distributed model, 161
HONDA, H., Description of cellular patterns by Dirichlet domains: the two-dimensional case, 523
HILL, T. L. and CHANCE, B., Steady-state kinetics of models of respiratory chain enzymes with isopotential pools and conformational site enzymes, 17
HINES, W. G. S., Mutations and stable strategies, 413
HURLEY, J. P. (see BUCHMANN, S. L.), 639
Hydrostatic pressure gradients, the electrical resistance of epithelia in the presence of osmotic and, 545
Hymenoptera, social, Fisher's theory of the sex ratio applied to the, 701

IWAMOTO, K. (see SENO, M.), 577
IWASA, Y., Optimal death strategy of animal populations, 611

JACOBSON, J. W. (see YČAS, M.), 443
JOHANSON, W. G. JR. (see HEARNE, E. M. III), 205
JUETERSONKE, G. (see ELSETH, G. D.), 429

KARCHER, L. P. (see ELSETH, G. D.), 429
Kinetic data for two independent saturable time by MULTIFIT II, a general purpose curve fitting program in FORTRAN IV, fitting, 219
KRASNOW, R. A., Mass, length and growth rate in single cells, 659

LASTERS, I. (see VAN HAM, P.), 269
Linked transport, implication to, the association between K^+ and H^+ distribution in skeletal muscle, 729
Logical control networks, reduction methods for, 269
Lung, a model for bacterial activity in, 205

MACWILLIAMS, H. K. and PAPAGEORGIOU, S., A model of gradient interpretation based and morphogen binding, 385
Malignant growth. Examples of the behaviour of chloroleukemia after specific perturbation, Monte Carlo simulation of, 257
MARKVART, T., Exciton transport in the photosynthetic unit, 91
MARKVART, T., Infinite model of connected photosynthetic units, 117
MARVIN, D. A. (see DUNKER, A. K.), 9
MATTHEWS, R. M. and ALBEN, J. O., Fitting kinetic data for two independent saturable terms by MULTIFIT II, a general purpose curve fitting program in FORTRAN IV, 219
MCQUARRIE, D. A. (see MULAŚ, P.), 475
Membrane potential, analytical solution of the Poisson-Balzmomn equation for, 603
Membrane transport through α-helical protein pores, a model for, 9
Metabolism, on the analysis of futile cycles in, 487
Metabolism and body mass, on the relationship between (letter), 757
Molecular evolution, information transformations in, 191
Morphogen binding, a model of gradient interpretation based on, 385
MULAŚ, P. and MCQUARRIE, D. A., Effect of surface charge density on the kinetics of trans-membrane lipid migration in asymmetric bilayers, 475
Muscle, skeletal, the association between K^+ and H^+ distribution: implication to linked transport, 729
Mutations and stable stragies, 413

Nucleolar aggregation: modelling and simulation, 81

Ornamental traits: the advantage of seeming fitter, sexual selection, adaptation, 377
Osmatic and hydrostatic pressure gradients, the electrical resistance of epithelia in the presence of, 545

PAPAGEORGIOU, S. (see MACWILLIAMS, M. K.), 385
Phosphates, on *ab initio* reinvestigation of PC and PH coupling contents in (letter), 751
Photosythetic unit, exiton transport in, 91
Photosynthetic units, infinite model of connected, 117
PIERCE, A. (see HEARNE, E. M. III), 205
PITT, R., Warfare and hominid brain evolution, 551
Polynomial, the binding, factorability of the hession of, the central issue concerning statistical ratios between binding constants, Hill plot slope and positive and negative co-operativity, 321
Population, animal, optimal death strategy of, 611
Post-transcriptional control in eukaryotic cells, a model of, 75
Proteins, globular, on the computation of the tertiory structure of, 443
Protein pores, α-helical, a model for membrane transport through, 9
Protein relatedness, Is the difference index useful for assessment of?, 743
